Milwaukee® Announces 2 New PACKOUT™ Additions: Dolly and Mounting Plate

MILWAUKEE, WI -- Milwaukee Tool continues to revolutionize tool transportation, organization, and storage for the trades with the addition of two new solutions to their widely popular PACKOUT™ Modular Storage System*. The PACKOUT™ System is not only the most versatile and durable modular storage system in the industry, it is also the largest with the launch of these new products. Through an intuitive and quick attachment mechanism, the new PACKOUT™ Dolly and Mounting Plate allow users additional options for transporting and storing their existing PACKOUT™ collections.

PACKOUT™ Dolly

Constructed with impact resistant polymer and a 250lbs weight capacity, the PACKOUT™ Dolly provides users with a convenient way to transport their tools and equipment throughout the jobsite. Its smooth roll wheels allow the Dolly to easily roll with a heavy load, while a QUICKSTOP™ Loading Lever enables users to hold the dolly in place when loading and unloading the PACKOUT™ dolly.

PACKOUT™ Mounting Plate

The PACKOUT™ Mounting Plate provides users the ability to stabilize and secure their PACKOUT™ Storage in the shop or in a vehicle. Like the Dolly, the PACKOUT™ Mounting Plate is constructed with impact resistant polymer and has metal reinforced mounting and

tie-down points that allow it to support & secure 100lbs of weight on the floor and 50lbs on the wall.

With the addition of the new PACKOUT™ Dolly and Mounting Plate, the Milwaukee® PACKOUT™ Modular Storage System now has 19 different pieces for users to choose from to build out their custom storage solution – making PACKOUT™ the most versatile and durable modular storage system in the industry.

**The PACKOUT™ Modular Storage System is the most versatile and durable modular storage system in the industry. An intuitive and quick attachment mechanism gives users the freedom to stack and lock PACKOUT™ tool boxes, organizers, totes, and bags of different sizes in numerous configurations that best suit their needs.
